LOKESH R

Coimbatore, Tamil Nadu, India
+91 9790637388 / portfolio | lokeshrajiv1@gmail.com | linkedin.com/in/lokeshr2005 | github.com/lokeshraju1

EDUCATION

Hindusthan Institute of Technology — **Coimbatore, India**
Bachelor of Technology in Information Technology; CGPA: 7.65 — Batch:2023 - 2027
Govt Boys Higher Secondary School, Mallavadi — Tamil Nadu, India
Higher Secondary Certificate (Class XII), Percentage:60% — Batch 2022 - 2023

SKILLS SUMMARY

- **Languages:** Python, SQL
- **Frameworks:** Pandas, NumPy, Scikit-Learn, Matplotlib, Streamlit
- **Machine Learning & AI:** Machine Learning, Deep Learning, Classification, Regression, Clustering, Feature Engineering, Model Evaluation, LLMs, Prompt Engineering, RAG
- **Tools:** Power BI, MySQL, Jupyter Notebook, VS Code, Git
- **Platforms:** GitHub, Google Colab, Hugging Face
- **Soft Skills:** Analytical Thinking, Team Collaboration, Leadership and Mentorship

WORK EXPERIENCE

PYTHON WITH ARTIFICIAL INTELLIGENCE INTERN | R-tech solution

• Developed Python programs using core concepts such as functions, loops, data structures, and file handling.
• Applied Python libraries for data processing, analysis, and visualization.
• Explored Artificial Intelligence and Machine Learning concepts through practical exercises and hands-on tasks.
• Practiced debugging, problem-solving, and writing clean, efficient Python code.

PROJECTS

Harvard's Artifacts Collection: ETL, SQL Analytics and Streamlit Showcase

- Built an ETL pipeline on the Harvard Art Museums API to collect artifact records by classification.
- Designed 3 SQL tables (metadata, media, colors) and ran 25+ analytical queries from Python.
- Developed a Streamlit app to collect, store and explore artifact data interactively.

ChocoCrunch Analytics: Sweet Stats and Sour Truths

- Extracted about 12,000 chocolate product records from the OpenFoodFacts API; cleaned data and handled missing values.
- Engineered metrics (sugar-to-carb ratio, calorie category, ultra-processed flag); stored data in 3 SQLite tables and ran 27 SQL queries.
- Presented EDA and SQL insights in a Streamlit dashboard.

EcoType: Forest Cover Type Prediction Using Machine Learning

- Cleaned and preprocessed 145,891 records, handled outliers and skewness, and balanced 7 cover classes.
- Compared Random Forest, Decision Tree, Logistic Regression, KNN and XGBoost, and tuned the best model.
- Built a Streamlit app for real-time forest cover type prediction.

Diamond Dynamics: Price Prediction and Market Segmentation

- Predicted diamond prices (converted to INR) on 53,940 records using regression models and an ANN.
- Segmented diamonds into market groups using K-Means clustering.
- Built a Streamlit app for price prediction and cluster identification.

Brain Tumor MRI Image Classification

- Built a custom CNN and compared it with pretrained transfer learning models to classify brain MRI images by tumor type.
- Applied data augmentation; evaluated with accuracy, precision, recall, F1-score and confusion matrix.
- Deployed the best model in a Streamlit app that returns the tumor type with confidence scores.

Business Reputation and Insights Analyzer using Google Maps Reviews and LLMs

- Collected Google Maps reviews through SerpAPI and cleaned them for analysis.
- Used LLM flows (Langflow, Hugging Face) for sentiment classification, theme extraction and summaries.
- Built a dashboard showing sentiment trends, top themes and generated improvement recommendations.

CERTIFICATIONS

Master in Data Science | CERTIFICATE — HCL GUVI
Python | CERTIFICATE — HCL GUVI
SQL | CERTIFICATE — HCL GUVI
Machine Learning | CERTIFICATE — HCL GUVI
Deep Learning | CERTIFICATE — HCL GUVI
Claude | CERTIFICATE — HCL GUVI

ACHIEVEMENTS

•.1st Place in Data Analytics, Techgyan Hackathon, Indian Institute of Technology, Madras — 12 April 2025
• Won several debate competitions in Tamil and English and hosted cultural events.
